```c
#include <stdio.h>

int main(void) {
    printf("Hello, world!\n");
    return 0;
}
```

```
1100  This is a \LaTeX\ example which displays the text as source code
1101  and in compiled form. \ほげ どうしたの？ %aaa あいうえお s
```

another language listing only example

```xml
<?xml version="1.0"?>
<project name="Package tcolorbox" default="documentation" basedir="."> <description>
        Apache Ant build file (http://ant.apache.org/)
    </description>
  </project>
```

text only example

LaTeX

text only モードって普通にやるのと一緒でなんで使うんだろうみたいなところある
